

The main objective of the tOSSad project is to start integrating and exploiting already formed methodologies, strategies, skills and technologies in F/OSS domain in order to help governmental bodies, educational institutions and SMEs to share research results, establish synergies, build partnerships and innovate in an enlarged Europe.

More precisely, the tOSSad project aims at improving the outcomes of the F/OSS communities throughout Europe through supporting the coordination and networking of these communities by means of state-of-the-art studies, national program initiations, usability cases, curriculum development and implementation of collaborative information portal and web-based groupware.

tOSSad project has many activity points, including but not limited to...

F/OSS study

F/OSS national programs

F/OSS usability study

F/OSS curriculum development

Dissemination & exploitation

tOSSad
